

Tenants Secure Jobs with Royal Mail

As our Bristol support team continues to help our tenants find employment within their local areas, we are pleased to announce that so far four of our refugee tenants have found jobs working for Royal Mail - following on from 15 of our tenants who secured jobs with the company last year. This is great news as it gives these refugees valuable experience of working life within the United Kingdom, whilst showing that our effective resettlement services are going from strength to strength.

At Ashley Community Housing we like to work closely with local communities in order to help our tenants comfortably integrate within them. Our Employability E2 (NOCN) course has just come to an end and we are fully expecting many of our learners to move onto jobs or even further education in their local areas. The next course will begin in January and is now open to tenants and any prospective learners in the Bristol area who would like to sign up.

If you are a local business with a job vacancy or volunteer opportunity, or, if you know anyone who would be interested in working with our brilliant tenants, please feel free to contact us to find out how YOU can make a difference.
