

EDUCATING REFUGEES IN CODING

ACH & CodeDoor: Educating Refugees in Coding

Article by:
Deena Baskin-Atkinson
Outreach & Training Officer | ACH Birmingham

Ashley Community Housing is excited to be partnering with CodeDoor, a non-profit organisation from Germany that educates refugees in computer programming. CodeDoor's mission is to aid integration by improving refugees' employment opportunities, with refugees able to earn a programming qualification in under a year. Our Birmingham branch is pleased to be working with CodeDoor to bring this wonderful opportunity to refugees in the West Midlands.

CodeDoor's model is based on four essential components: an efficient workspace, e-learning content, laptops, and a community of inspired individuals. Currently, we have access to the e-learning content and a suitable workspace, and we are in the process of building our network and our community. Terry Williamson, our talented volunteer facilitator, is currently engaging students in the first phase of the programme. As we secure more learners, however, we anticipate a great need for laptops and would deeply appreciate any donations. Furthermore, if you would like to work with us to foster career opportunities for our participants, we welcome the partnership.

Please contact the Birmingham branch of Ashley Community Housing for additional information.

Integration through education!

CodeDoor is a non-profit organisation educating refugees in computer programming by providing tutors, material, and an efficient learning environment.

Our mission

We teach refugees how to code web applications.

Our experienced volunteers offer training, inspiration, and a deep knowledge of the job market. Our goal is to improve employment opportunities for refugees and aid integration.

Workspace

We provide an efficient working environment, the right resources, and a team of talented teachers.

E-learning Content

We partner with the best e-learning platforms to offer the right courses.

Laptops

Thanks to our partners, we provide our students all the tools they need to learn an invaluable skill.

Community

We bring people together to create opportunities and friendships.

Become a student

If you speak English and have a little IT knowledge, you can join the CodeDoor program and learn to code.

We provide resources for you to learn efficiently:

- Classrooms with internet
- Laptops
- E-learning content
- Motivated and talented tutors
- A community of inspired individuals
